

Global Risk Identification Program (GRIP)

Overall report organization

Maxx Dilley

United Nations Development Program

Goal and objectives

- Goal: Increased use of disaster risk information for risk management decision making
- Objectives:
 - 1) A consolidated, updated, and improved global evidence base for disaster risk management
 - 2) Greater access to evidence on global disaster risk levels and risk factors
 - 3) Increased capacity to analyze disaster risks in high risk countries

Outputs and Inputs

- **Outputs:**
 - 1) A global disaster risk report containing results and interpretation
 - 2) An on-line, queryable GIS data platform giving access to input data sets and results
- **Inputs:**
 - 1) Improved hazard, exposure and vulnerability data sets
 - 2) An enhanced global disaster risk assessment methodology
 - 3) Chapters on specific high risk situations by local experts conforming to common theoretical and methodological standards

Global risk update

- Characteristics (ref. January risk expert meeting)
 - 1) an overall theme e.g. disasters and poverty, urban risks
 - 2) global hotspots update
 - 3) country benchmark index(es) e.g. DRI, Indicators of Disaster Risk Management in the Americas
 - 4) "focus on ..." case studies that have particular applications (ideally 1 and 4 would link; the first issue could focus on something general, e.g. mainstreaming or recovery)

Global risk update

- Main tasks and actors
 - Data preparation (partners, CU coordination)
 - Methodologies/analyses (TBD)
 - Risk data platform (CU, WB, UNEP)
 - Country analyses (partners, UNDP/UNEP coordination)
 - Peer review (CU coordination)
 - Report compilation (CU, WB, UNDP)
 - Publication (TBD)
