A NOTE ABOUT DATA: During Day in the Life, you will be collecting data to submit to event organizers to share with other participating groups. Data collection is a central part of this event. Everyone shares and learns from the data and all of it is important, no matter what grade level collects it. We provide training, support, and equipment in the expectation that participants will send in their results. When we do not receive any data back we must reconsider whether to provide support in the future, chasing after data is time consuming. Prior to the Day in the Life event make a plan for how your group will collecting, recording and submitting data. Be sure someone is assigned to sending in the data. Please contact us for suggestions on how to manage recording and reporting. Thank you!
