Ed,

Graham Farquhar and I have organized a miniconference on relative humidity. To be held at Lamont on June 23 - 24, it will feature the triple oxygen isotope measurements made by Boaz Luz and Amaelle Landais. The invited participants are listed on the attached email. All have agreed to attend.

Until we get airfare estimates from the invitees, we will not be able to estimate the total cost. Peter Schlosser has offered CORC ARCHES funding. My suggestion is that we ask the Climate Center for \$7000 and then take the remainder from the NOAA grant. Thus I make the request for \$7000 from the Climate Center for partial support of this meeting.

Cheers, Wally

Participants,

It's now official! The miniconference on the dependence of relative humidity on earth temperature will be held at Lamont-Doherty on Monday and Tuesday, June 23rd and 24th. The invited participants are as follows:

- Randy Koster, GSFC/NASA
- Boaz Luz, Hebrew University
- Amaelle Landais, LSCE/IPSL
- Graham Farquhar (host), Australian National University
- Wally Broecker (host), LDEO
- David Rind, GISS
- Jim Anderson, Harvard
- Kerry Emanuel, MIT
- David Noone, University of Colorado
- Albert Arking, Johns Hopkins University
- Garth Paltridge, University of Tasmania
- Steve Sherwood, Yale University
- Dieter Kley, Forschungszentrum Juelich
- Jean Jouzel, LSCE/IPSL

For those of you your traveling to New York or Newark by air, we will cover your fare provided it is as modest as feasible. To accomplish this, please book as early as possible. In the meantime, please provide me with an estimate of its cost so that we can prepare a budget for the meeting. If you have any questions about lodging, etc., please contact Moanna St. Clair (stclair@ldeo.columbia.edu).

As the meeting approaches, Graham and I will contact you regarding the program.

Cheers, Wally
