

Lamont-Doherty Earth Observatory

Invites you to celebrate

The Plate Tectonics Revolution at Lamont: 50 Years of Discovery

23- 24 May 2016

Presentations (*agenda attached*)

9:00 am- 5:00 pm

Monell Auditorium

23 May 2016

You and a guest are invited to
a reception and dinner at

5:30 pm

Gary C. Comer Building

Organizing Committee

Chairs

W. Roger Buck

William B. F. Ryan

Members

Suzanne M. Carbotte

Einat Lev

Gregory S. Mountain

Donna J. Shillington

Sean C. Solomon

Lynn R. Sykes

Please RSVP to events@ldeo.columbia.edu
by 5 May 2016

You are invited to a two-day symposium to celebrate Lamont's role in the plate tectonics revolution and the continuing advances in our understanding of plate tectonics over the past 50 years.

An important goal of the symposium is to give students and early career scientists a taste of the excitement of being in the vanguard of a scientific revolution. The meeting will honor a number of scientists who contributed to the early development and confirmation of the theories that led to plate tectonics. It will include scientific presentations by distinguished scientists who were involved in plate tectonics from the beginning and those who continue to investigate plate tectonics processes today.
