

Lamont Mini-Conference: Bayesian Methods of Climate Field Reconstruction

Co-organizers:

Edward R. Cook, Tree-Ring Laboratory, Lamont-Doherty Earth Observatory
Eugene R. Wahl, NOAA/NESDIS/NCDC/Paleoclimate Branch, Boulder, CO
Eduardo Zorita, GKSS Research Center, Geesthacht, Germany

Proposal Request: \$6,740

Abstract

With my co-organizers Eugene Wahl and Eduardo Zorita, I am requesting from the Climate Center financial support to hold a 3-day mini-conference at Lamont on “Bayesian Methods of Climate Field Reconstruction.” This workshop will be held on February 9-11, 2011. The financial support requested from the CC is in the amount of \$6,740 to add to \$5,000 already committed to the mini-conference by PAGES. The PAGES money augment the CC money used to cover local housing, food, and miscellaneous conference expenses.
