Answer the questions below based on the table above.

- For the sites listed, which fish was caught in greatest numbers on October 12th?
- Which species was caught in the most places (on the list) on October 12th?

In the Hudson River Estuary, the water near the ocean is salty, while further upriver it is fresh. The leading edge of salty water is called the **salt front**. On October 12th the salt front was somewhere between Poughkeepsie and West Point.

- Based on the location of the salt front, which of the listed fish species are found mainly in saltwater?
- Which species are found mainly in freshwater?
- Which species is likely to be found throughout the whole estuary, in both fresh and salty water?
