Puzzling Over Arctic Climate

Our Connections to the Arctic

Margie Turrin & Laurel Zaima

Lamont-Doherty Earth Observatory
COLUMBIA UNIVERSITY | EARTH INSTITUTE

What are we looking at?

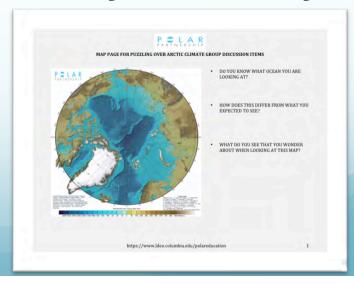

Discuss & Record Responses

- As a class or in small groups discuss and record responses on your sheet:
- Do you know what ocean you are looking at?
- How does this differ from what you expected to see?

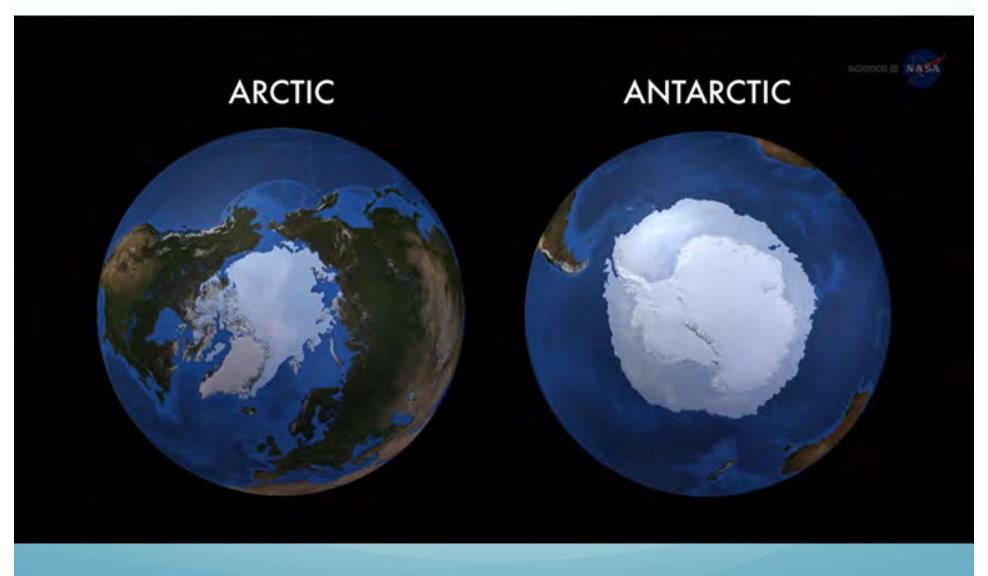

When looking at the map what do you see that you

wonder about?

SHARE WITH THE GROUP

The Arctic as a region is ocean covered with sea ice

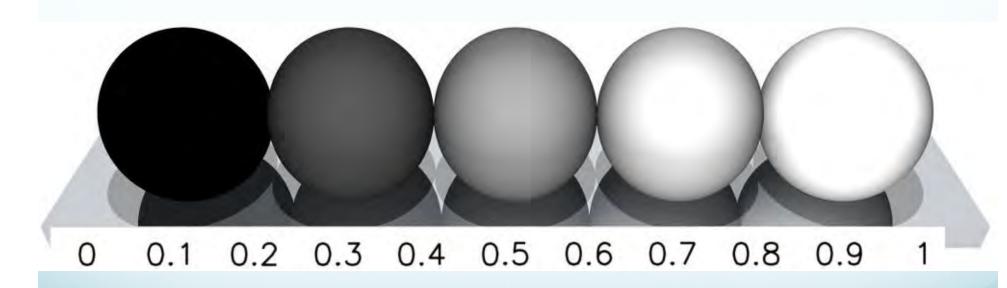

What is sea ice?

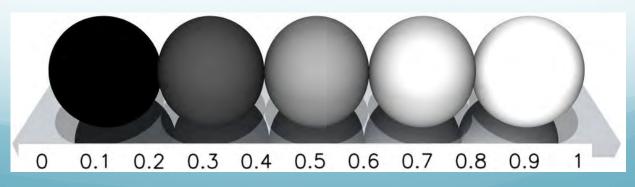

Photo M. Turrin. March 28th, 2012

It is all about Albedo

Color of an ocean from space - estimate the albedo

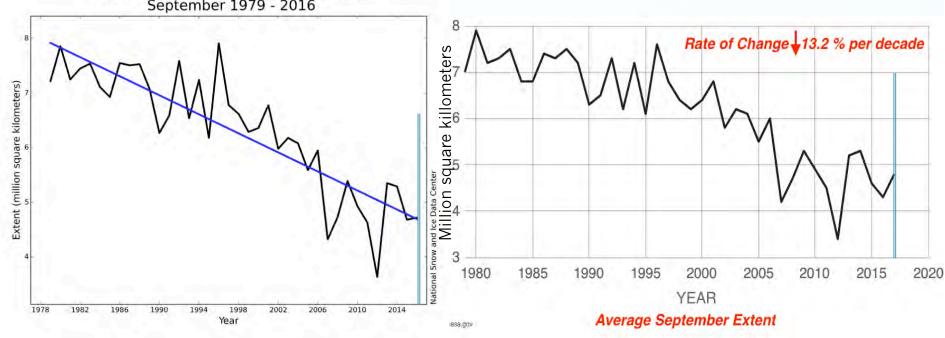

NASA Sea Ice Story

Source: National Aeronautics & Space Administration (NASA)

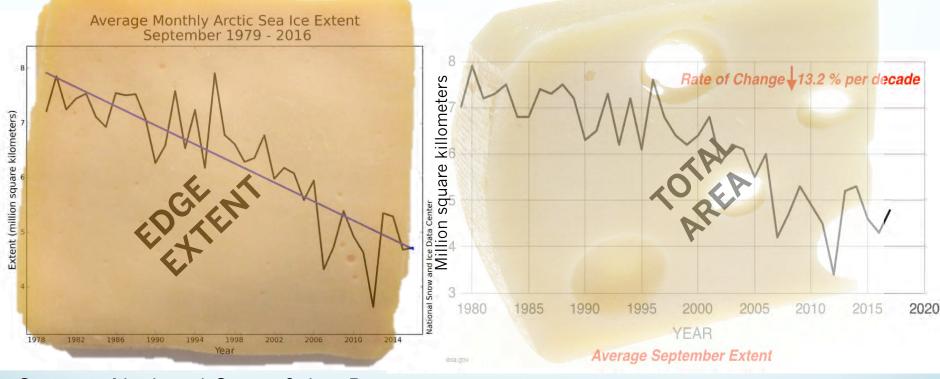

Which is it? Left or right graph?

Lamont-Doherty Earth Observatory

COLUMBIA UNIVERSITY | EARTH INSTITUTE

Depends on the 'area' definition selected

Source: National Snow & Ice Data Center (NSIDC)

Source: National Aeronautics & Space Administration (NASA)

Which is it?

Linking to your past...

Imagine the Arctic in the year you were born.

- Was it closer to the 1980 extent o the 2012 extent?
- What about the year your parents were born?
- What do you think future Arctic sea ice will look like?

The Once & Future Arctic

Can we change the projected arctic sea ice? We can make a difference through committing to take new action(s).

- Read through the "What more can you do?" sheet and commit!
- Be proud of the things you are already doing, but to make a difference we need to take new actions!

What More Can You Do?

Make A Commitment to Do More to Reduce Your Contribution to Climate Change. I will:

Walk, ride your bike, take the bus

When leaving the room I will turn off the lights!

Unplug! Play games, play outside, read

Turn off your computer when done

Take a 5 minute warm short shower, not fill up a hot bath

Turn down the heat at home and wear a sweater

Pack a lunch in a cloth bag and use refillable containers

Skip the dryer, hang dry your laundry

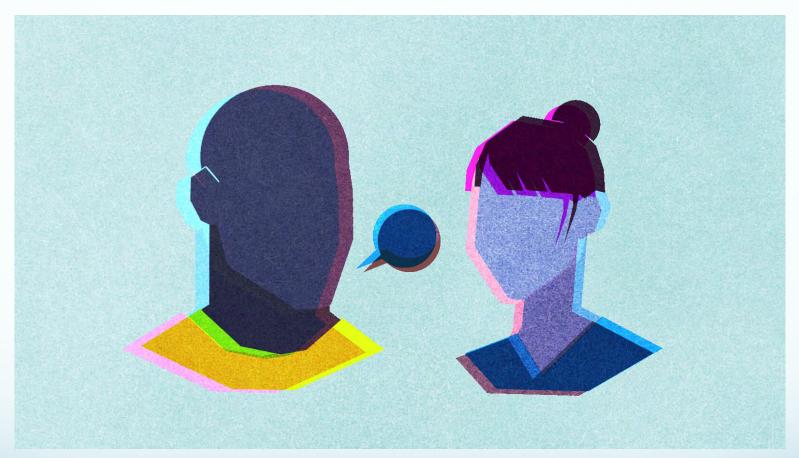

Talk to my Friends about what I do to help! Be an Example!

Reuse! Reduce! Recycle!

Just talk about it already!

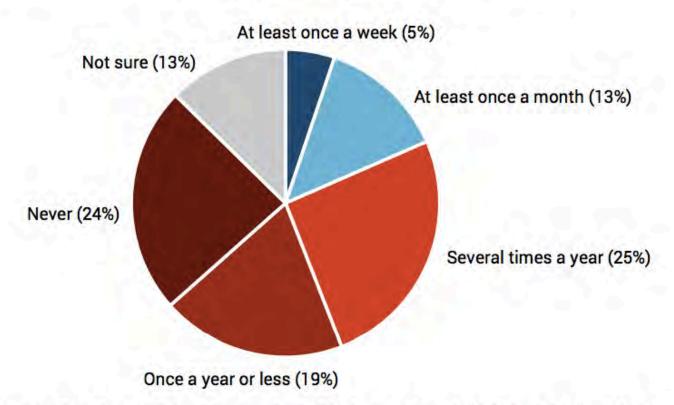

This is one of the more important things you can do! Break the 'Spiral of Silence' around climate change!

Illustration from Amelia Bates, grist.org

Just talk about it already!

Only One in Five Americans Hear People They Know Talk About Global Warming At Least Once a Month

- One in Four Never Hear it Discussed -

About how often do you hear other people you know (your family, friends, co-workers, etc.) talk about global warming?

Base: Americans 18+ (n=1,204). March, 2016

How to start talking...

- Tell personal stories
- Focus on solutions
- Think of slogans & memorable ways to say it!
